***Emory University seeks an outstanding first-year class in much the same way that other highly selective colleges and universities do. And so, objective information such as curriculum, grades and standardized test scores are important as we select candidates for the first-year class. However, so too are the personal attributes of the students. As an institution, we are looking for students who are engaged in their communities and curious about what lies beyond their hometown, state, and nation. In short, we want students who aspire to be vibrant lifelong learners, with their university education being only the first step in that process. In addition to academic credentials, the admissions committee carefully evaluates subjective material such as extracurricular activities and a student's potential to contribute to the life of the university, personal essays and letters of recommendation. All of this valuable information paints a vivid picture of who each applicant is to the Admission Committee and decisions are based not on individual pieces of the application but on the entirety of an applicant's profile.														
AP Recommendation	For entering first-year Emory College students a combined total of 24 credit hours of the following types of credit may be granted – AP credits, International Exam Credits, and other college credit. Beyond the 24 hour credit limit, Emory College will use the additional exams or courses to fulfill prerequisites for placement into higher level courses. We typically will award three semester hours of college credit for each score of four or five on examinations of the Advanced Placement (AP) Program of the College Entrance Examination Board.
